

A 47-year-old male presents to your clinic with a chief complaint of impotence. His hearing is poor and he has a constant dull ringing in his ears. He also presents with soreness and weakness of the lumbar region and knee joints, dizziness and cold limbs. His hair is thin and began to turn grey in his early 30s. His tongue is pale with white coating. His pulse is deep and weak.

Please mark the four needle technique point prescription in the picture.
